

## Larner-Johnson® Plunger or Needle type Flow Control Valve

---

## Ultimate Flow Control

---

The Larner-Johnson® valve is a plunger or needle type flow control valve used for in-line pressure or flow control applications and offers fine (full range) adjustment. The valve can also be used for free discharge control at pressures above that of the Fixed Cone valve.

**Series 3137:**

Inline-Regulating

**Series 3168:**

Pressure Sustaining

**Size Range:**

3" - 100";  
DN15 - DN2500

**Material:**

Ductile iron,  
Cast Steel &  
Aluminium Bronze

**Pressure Rating:**

Up to 50 bar

**Medium Velocity Discharge Capability:**

Up to 12m/sec
